

Advanced Time Entry

Go Green. Save Money.

Greenshades Online's Advanced Time Entry was built from the ground up for flexibility and scalability. Designed for your business reporting needs, some of our great new features include:

- Overtime rule support
- Web time clock and manual entry support
- Supervisor entry, editing and review
- Support for multiple companies
- Flexible reporting solution
- Weekly, bi-weekly and semi-monthly pay schedules (mixable)

Built for Dynamics GP

Once reviewed, all entries can be easily synchronized into Dynamics GP payroll batches. Data can be recalled at any time for reporting needs. Advanced Time Entry natively supports Dynamics GP Payroll codes and will fit seamlessly in your current payroll processes.
