

COMBINE COMPANIES

Companies using Microsoft Dynamics GP often have multiple company databases set up that reflect different components of a single company.

The Combine Companies module automatically merges information across selected databases and combines any employees with the same SSN. The resulting electronic report represents a single EIN and contains information from each of the databases.

Company ID	Company Name	Include	Submitter
SSB1	Sara's Sandbox #1	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
TWO	The World Online, Inc.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
		<input type="checkbox"/>	<input type="checkbox"/>
		<input type="checkbox"/>	<input type="checkbox"/>
		<input type="checkbox"/>	<input type="checkbox"/>

Company ID: TWO
