

## Invoices & Past Due Notices

Sending out invoices and managing payments can be a tedious process. Greenshades offers an out-source solution that integrates directly with Dynamics GP and the invoices you have created therein. We will print and mail your bills using eco-friendly supplies and energy-efficient machinery, making this process cheaper and greener than could be accomplished in-house. Because of our integration with Dynamics GP, all you need to do is create the invoice and forget about it-- your days of printing, stuffing, and mailing have come to an end.

Your customers may remit payment by mailing a check in a return envelope that we provide. We will also include a code in the mailing that they can use to log into a secure payment website. Once online, your customers can download their invoice exactly as it appears within Dynamics and pay using a credit card. When your customers pay online, you receive the money faster and your company saves the expense of return postage. Greenshades does not hold payment, but rather sends the money directly to you by using your merchant services. In addition to easy payment processing, invoices paid online also have the advantage of being automatically updated in Dynamics through the two-way Greenshades integration.
