# GREENSHADES 401(k)

One Step Filing

Save time with electronic reporting to any retirement provider. The Greenshades 401(k) package uses a direct integration with Microsoft Dynamics GP and SL to extract all of the information that is relevant to a specific financial institution. Information will be correctly pulled from deduction codes, check history and other sources.

Greenshades will use the information from payroll records to create an electronic file ready for submission to the 401(k) provider.

Enjoy customized reports to manage contributions, loans, repayments, eligibility and much more.
